June 24, 2009 SPH - CPHP Program Satellite Downlink Fact Sheet

A Note to all satellite receive sites: we strongly recommend that you check your receiver prior to the broadcast. For C-band users if you are unsure if the satellite is programmed into your receiver please call the technical support phone number any day prior to the broadcast date and we will work with you to confirm you can see the satellite the broadcast will be on.

For Ku band Digital receive sites, we recommend you do the same, except that we can tune you to the exact coordinates because there is a signal at those coordinates 24/7. Please make sure the clock in the digital picture is moving – this will confirm that the receiver or transmission has not locked up.

A slate identifying the program will be broadcast during the test period – if you do not see the slate – call the satellite technical support number – 518-453-9521 or 518-443-5333.

Program Date: June 24, 2009 (CPHP)

Test time: 9:30 A.M. (ET)

Program start: 10:00 A.M. (ET)

Program end: 11:00 A.M. (ET)

Please check your signal during the test time indicated above.
