

Engaging the Public in Pandemic Flu Planning

Thursday, January 11, 2007

Roz D. Lasker, MD

Director, Division of Public Health and
Director, Center for the Advancement of
Collaborative Strategies in Health - The
New York Academy of Medicine

Public health professionals responsible for pandemic flu planning are working at a distinct disadvantage. While the public is the object of their concern, strategies and plans are being developed without directly involving the public. Building on findings from the Redefining Readiness study and a new community engagement process in the four Redefining Readiness demonstration sites, Dr. Lasker will show how the public's knowledge and perspectives can help public health professionals deal with some of their most vexing challenges.
