

## **Emergency Preparedness for Veterinarians: Prevention of Zoonotic Disease Transmission**

### **Original Program Date & Location:**

August 2, 2006, Latham, NY

### **Audience:**

Veterinarians, Veterinarian Technicians and other professionals who work with animals or who are involved with preparing for and responding to zoonotic disease outbreaks.

### **Program Description:**

In this one-hour condensed version of the original 3-hour training, Dr. David Chico, VMD, Emergency Preparedness Veterinarian for the New York State (NYS) Department of Agriculture & Markets and Dr. Bryan Cherry, VMD, PhD, Deputy Public Health Veterinarian for the NYS Department of Health, present information on the following topics:

- factors that promote the transmission of zoonotic diseases;
- roles of veterinarians in reporting diseases and assisting with surge capacity;
- CDC category A, B and C bioterrorism agents; and
- components of epidemiological investigations of zoonotic diseases, including surveillance

### **Program Sponsors:**

The New York Consortium for Emergency Preparedness and Continuing Education, funded by the Health Resources Services Administration Bioterrorism Training & Curriculum Development Program.

Co-sponsored by the NYS Capital District Veterinary Medical Society
